Dear,

I am excited to pursue advanced studies in responsible procurement and supply chain management. Equipped with a strong background in logistics, operations, and supply chain processes—further enhanced by practical exposure gained from event planning, vendor coordination, and strategic thinking—I look forward to deepening my knowledge of sustainable and socially responsible practices in the field.

I am currently pursuing a Bachelor of Technology in Artificial Intelligence and Machine Learning at GITAM University. Through this program, I have developed problem-solving and analytical capabilities that align with the evolving needs of procurement and supply chain management. My experience as Inventory and Logistics Lead for Shore Fest 2023 enabled me to manage large-scale inventory operations, streamline resource allocation, and coordinate cross-functional teams. Additionally, my role as Operations Manager at GStudio Club allowed me to oversee logistics, finance, and external affairs for multiple events and projects.

With a passion for ethical business practices and a keen interest in sustainable logistics, I aim to enhance my ability to contribute to efficient, responsible supply chains. I look forward to engaging with like-minded peers and mentors while gaining the skills and insights needed to shape a more sustainable and ethical global supply network.

Thank you for giving me opportunity for applying.

Sincerely,

Gantasala Tanooj Vardhan
